Dear HUNRE's distinguished partners,

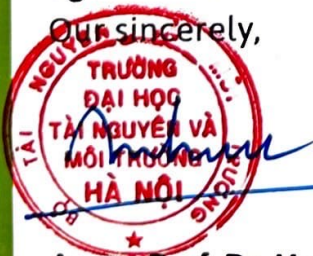

The International Conference "Geospatial Integrated Technologies for Natural Hazards and Environmental Problems" within the frame of GeoInformatics for Spatial-Infrastructure Development in Earth and Allied Sciences (GIS-IDEAS) 2023 was successfully organized at Hanoi University of Natural Resources and Environment (HUNRE) from November 7th to 9th 2023.

With a wide range of scientific topics from geoinformatics to integrated technology, including artificial intelligence for prediction and warning of natural hazards, the GIS-IDEAS 2023 attracted more than 200 participants from Vietnam, Japan, India, Thailand, Italy, Australia, the Philippines, et cetera. On behalf of the Organizing Committee, we genuinely want to thank HUNRE's partners who have participated and contributed to the conference not only academic knowledge but also potential research ideas and amazing stories through their scientific content, comments, and feedback for an outstanding scientific community with the aim of promoting the scientific network regarding geoinformatics serving the development of Vietnam particularly and other countries in general. We also give great appreciation to our sponsors, the Ministry of Natural Resources and Environment Vietnam; Osaka Metropolitan University, Japan; Everest Schools Vietnam; and the Nexttech Group of Technopreneurs Vietnam.

However, mistakes always come, even with a perfect plan, therefore, your understanding of our hard-working people is always appreciated.

Finally, we wish you all success in your scientific path and hope to see you again soon.

Yours sincerely,

Assoc. Prof. Dr. Hoang Anh Huy

Rector, Hanoi University of Natural Resources and Environment
